

## **Strategic Plan project:**

**Code No: 2- 1- 5.**

**To support and motivate faculty members, students to participate in the community services.**

**Prepared and drafted by: Dr.Pervez A. Razak**

**Dr. Saad M. Al-Qahatani**

**To support and motivate faculty members, students to participate in the community services.**

**AIM:**

To support and motivate students, faculty members in the community services.

**OBJECTIVE:**

To plan and provide the best dental treatment available to people through community services.

To provide high quality services and comprehensive dental care at College of Dentistry, Najran University.

**GOAL:**

Involvement of students, faculty members so as to participate and volunteer work in community services.

### **Target Groups:**

1. Educational institutions
  - (i) Primary Schools.
  - (ii) Intermediate and Secondary Schools.
  - (iii) Institutions and Vocational communities.
2. Homes for handicapped (children and adults).
3. Homes for the elderly.
4. Rehabilitation and Correction center
5. Shopping Malls
6. Participation with other department of ministries in K.S.A to involve active participation in programs such as Unified GCC oral health, traffic, civil defense, blood donation day and in celebrations of national and religious occasions.

### **Program Structure:**

This community based program can be structured in three phases.

**Phase I: An Oral health educational program**

**Phase II: A Clinical Preventive Dentistry Program**

School Based Preventive Program

School Linked Preventive Program

**Phase III: A Community Based Oral health Program**

## **Introduction:**

Dental Health in Saudi Arabian population has received significant attention. Oral health has become a top priority for government, health providers and dental professionals. The very high levels of dental decay in both primary and permanent teeth need to be brought down. This requires an immediate and effective community and school based dental health education & preventive programs to be carried out in community services.

As College of Dentistry, Najran University is one of the major dental health provider in this region we therefore need to have in place a comprehensive program where the ultimate vision is to provide the finest preventive and curative dental services for infants, children, adolescents and adults with dental care needs in all the various target groups through the active participation in community services.

## **Program Overview**

### **1. Appropriate & Effective:**

- The program should reflect the appropriateness and technical quality expected of the college of Dentistry, Najran.
- The program should deliver more than other dental service providers in terms of treatment facilities.
- The program should be effective in the sense that it reaches all segments of the society especially groups at high risk for dental diseases.

### **2. Good Organization:**

- The program is well coordinated and all stake-holders are aware of their duties and functions. Adequate training of students is ensured for quality assurance of the services being provided.

### 3. Sustainable:

- The program should demonstrate sustainability for repeated implementation and in terms of program expenses.

### 4. Cooperation:

- Shared partnerships are established between departments, staff, students, sponsors and participating schools and communities to administer and sustain the program.

### 5. Aims/Rationale:

- The program's goals and objectives should be linked to national oral health goals and provide oral health data for evaluation.

### 6. Resources & Funding:

- The program will initially be funded by Najran University. However in the long term sponsors will be approached for long term funding of the program including supplies of educational and sample materials.

### 7. Program Evaluation:

- The evaluation of the program will be on yearly basis conducted by an inter-departmental committee under the Dean and chairman of the community programs.

### **Phased Structure and set up:**

The program will institute:

**Phase I:** An Oral health educational program

**Phase II:** A Clinical Preventive dentistry Program

**Phase III:** A Community Based Oral health Program

### **Phase I: An Oral health educational program**

The first phase of the program will be purely educational and aim to provide educational information to all the target group which will be consistent, coordinated, and well-designed for effectiveness of communication and clarity so as to inform the knowledge of dental being.

### **The Program aims to provide Oral Health education based on:**

- Dietary Practice for Good Oral Health
- Methods to Prevent dental decay
- Plaque control measures including tooth brushing methods

### Recommendations for students:

A well done bonus plan is motivational, exciting, and rewarding to the students by:

- Giving them a letter of appreciation.
- Award for outstanding performance.
- Showing support personally and professionally.
- Monetary rewards.
- Attendance shortage can be considered.
- Requirements for case completion by the students can be considered.
- Evaluation and good feedback to be given.

### **Recommendations for faculty members:**

- Giving them a letter of appreciation.
- Memento and certificate of excellence to be awarded.
- Monetary benefits.
- Compensatory leave to be provided.
- Evaluation and good feedback to be given.

### **Program Summary:**

- The program aims to link the community and preventive program to the college curriculum for proper implementation and sustainability.
- A phased program is recommended to put in place the requirements of each phase as we progress.
- We also endeavor to link dental health education to an active clinical preventive services.
- The program will address the patient needs of students in all specialties so to as to fulfil their criteria and requirements in all branches of dentistry.
- This proposal is open to suggestions and improvements.
