Objectives

1. What is the main purpose for this course?

This course is an advanced course for undergraduate students which is of two parts; theoretical and clinical parts. The clinical course introduces the dental student to the practice of clinical orthodontics. The primary goal of this course is to reinforce didactic concepts taught in the previous orthodontic course and build upon them in a manner that will better prepare the student to recognize, communicate and manage orthodontic problems in the general dentistry setting. The students will:

- Earn adequate efficiency in orthodontic diagnosis.
- Have knowledge about orthodontic appliances.
- Be able to make cephalometric and study cast analysis.
